

Part 1

Structure and Written Expression

Structure and Written Expression (1)

Part A:

Directions

In part A you will find that each problem consists of an incomplete sentence. Four words or phrases (A), (B), (C), (D) are given below the sentence. You are to select the one word or phrase that best completes the sentence. Then blacken the oval to indicate your answer.

1. Overexposure to the sun causes _____ health problems.
 - a) various
 - b) among
 - c) but
 - d) of
2. Birds head south to warmer climates when _____.
 - a) is cold weather
 - b) does cold weather come
 - c) cold weather comes
 - d) comes cold weather
3. The city council is empowered not only to enact new laws, _____select a new mayor between elections should the need arise.
 - a) and to
 - b) but also to
 - c) and
 - d) so that
4. Drying of meats and vegetables is no longer considered one of _____ of preserving food.
 - a) the ways are useful
 - b) the ways most useful
 - c) the most useful ways
 - d) most are useful way
5. A giant kind of grass, bamboo may reach a height of 120 feet and _____.
 - a) a diameter of one foot
 - b) its diameter is one foot
 - c) there is a diameter of one foot
 - d) which is a diameter of one foot
6. A thermometer is an instrument that _____ temperature.
 - a) the heat
 - b) having
 - c) does not
 - d) measures
7. Aspirin is used _____ a constriction of the blood vessels.
 - a) the counteracting

- b) to counteract
 - c) counteract
 - d) counteracting
8. The nuthatch _____ six inches long.
- a) grows seldom more than
 - b) more than seldom grows
 - c) seldom grows more than
 - d) grows more than seldom
9. Composing more than forty percent of the diet, fats are _____ by the body for energy.
- a) using specifically
 - b) used specifically
 - c) specific use
 - d) the use specific
10. The sea mammal *medusa* is popularly called a jellyfish because it _____ jelly.
- a) looks rather like
 - b) looks like a rather
 - c) which looks rather like
 - d) which looks like rather
11. Therapists are currently using mental imagery in the hope that it might prove _____ in the treatment of cancer.
- a) helpful
 - b) for help
 - c) helpfully
 - d) with the help
12. By praying outside saloons, throwing rocks in saloon windows, and destroying saloons with her hatchet, _____.
- a) alcohol was prohibited by Carrie Nation
 - b) Carrie Nation worked to prohibit alcohol
 - c) Prohibiting alcohol by Carrie Nation
 - d) Carrie Nation's work for the prohibition of alcohol
13. Somerset Maugham, a novelist, _____ about a restless man's quest for inner understanding in *The Razor's Edge*.
- a) who wrote this
 - b) who wrote
 - c) when he wrote
 - d) wrote
14. _____ cockroach is the pest most in need of eradication is generally agreed upon by housing authorities everywhere.
- a) When the
 - b) It is the
 - c) That is
 - d) The
15. _____, the jaguar used to roam freely in the southwestern United States.
- a) It is now found only in central and South America

- b) Now finding in Central and South America
- c) To be found in central and south America
- d) Now found only in Central and South America

Part B:

Directions

Each sentence in part B has four words or phrases underlined. You are to identify the word or phrase (A), (B), (C), (D) which should be corrected or rewritten. Then blacken the appropriate oval to indicate your answer.

16. The larger of the forty-eight continental states in the United States is Texas.

A
B
C
D
17. According to the experts, genetic inheritance is probability the most important factor in determining a person's health.

A
B
C
D
18. The railroad was one of the first methods of transportation to be use extensively in early American history.

A
B
C
D
19. The National Wildflower Research Center which was established in 1982 by Lady Bird Johnson on sixty acres of land east of Austin.

A
B
C
D
20. Pioneers on the plains sometimes living in dugouts, sod rooms cut into hillsides.

A
B
C
D
21. The need to improve technique motivates ballerinas exercising and rehearse for hours daily.

A
B
C
D
22. While his racing days, racehorse John Henry earned a record \$6.5 million, \$2.3 million more than his closest competitor.

A
B
C
D
23. Often when the weather is extremely hot, people have very thirsty but are not terribly hungry.

A
B
C
D
24. The idea that artistic achievements rank in importance with scientific

A
B

- achievements has been upheld by painters, writers, and musicals for centuries.
C D
25. To improvement the stability of the building, a concrete foundation two feet
A B C
thick must be installed.
D
26. In 1784 Benjamin Franklin first suggested daylight savings time as a means of
A B
cutting down on consumes candles.
C D
27. An alligator is an animal some like a crocodile, but with a broad, flattened snout.
A B C D
28. A new form of cocaine, crack attacks the nervous system, brain, and bodily in a
A B C
sharper fashion than cocaine.
D
29. It has been suggestioned that the battleship “Missouri” be brought back to
A B C
active duty, at a cost of \$475 million.
D
30. Into among the five Great Lakes, only Lake Michigan is located entirely within
A B C
the territorial boundaries of the United States.
D
31. Teddy Roosevelt demonstrated his competitive spirit and tireless energy in 1905
A B
whenever he led the Rough Riders up San Juan Hill.

Part 2

Listening comprehension

Listening Comprehension (1)

Part A:

Directions

For each question in part A, you will hear a short sentence. Each sentence will be spoken just one time. The sentences you hear will not be written out for you. Therefore, you must listen carefully to understand what the speaker says.

After you hear a sentence, read the four choices in your test book, marked (A), (B), (C), and (D), and decide which one is closest in meaning to the sentence you heard. Then, on your answer sheet, find the number of the question and fill in the space so the letter inside the oval cannot be seen.

1. (A) Will you take a flight?
(B) Do you have to fly?
(C) What time's your departure?
(D) When will you arrive?
2. (A) The room could've been smaller.
(B) The room wasn't big enough.
(C) It was necessary to have such a big room.
(D) The room wasn't very big.
3. (A) The teacher read one chapter per week.
(B) The teacher recommended reading one chapter per week.

(B) We haven't seen any rain for many years.
(C) It's been many years since it's rained.
(D) We don't like this rain.
14. (A) She saw Nick at the time she hit the truck.
(B) She has a knack of missing trucks all the time.

- (C) She barely avoided the truck.
(D) When she missed the truck, she swerved for a time.
15. (A) The lawyer sat down with her to watch the news.
(B) When the lawyer sat down, he broke the chair.
(C) The news story about the lawyer broke quickly.
(D) The lawyer told her what had happened.
16. (A) Suzanne was stunned when she saw the dress.
(B) Suzanne began to dress for the party.
(C) Suzanne brought a new dish to the party.
(D) Suzanne purchased an attractive new outfit.
17. (A) It'll cost more to include an additional stop.
(B) The free agent toured another city.
(C) The addition of the fee angered the agency.
(D) In the next city, the agency will feed the tourists..
18. (A) The child was too afraid to remain.
(B) The child ran into the room because she was frightened.
(C) The child decided to stay longer in the room.
(D) They longer she stayed, the more frightened she became.
19. (A) She selected some wide shoes at the mall.
(B) There's a variety of shoes to choose from at the shopping center.
(C) You can choose what you want after all.
(D) There's a wide selection of schools in the fall.
20. (A) He's required to attend the seminar.
(B) He's still attending the seminar.
(C) He hasn't attended any seminars.
(D) He'll attend a seminar later.

Part B:

Directions:

In part B you will hear short conversations between two speakers. At the end of each conversation, a third person will ask a question about what was said. You will hear each conversation and question about it just one time. Therefore, you must listen carefully to understand what each speaker says. After you hear a conversation and the question about it, read the four possible answers in your test book and decide which one is the best answer to the question you heard. Then, on your answer sheet, find the number of the question and fill in the space that corresponds to the letter of the answer you have chosen.

21. (A) He's reserved in answering the question.
(B) It's possible to sit anywhere.
(C) Some of the seats are being saved for others.
(D) There's only one section of seats.
22. (A) Leave the session.
(B) Sit down.
(C) Mind him.
(D) Conduct the session.
23. (A) He's finished with the dishes.
(B) He worked on his term paper after finishing the dishes.
(C) He doesn't like doing his term paper.
(D) The dishes aren't done yet.
24. (A) That she leave New York with Mike.
(B) That she go to the airport after work.
(C) That she ask someone else to take her.
(D) That she leave tomorrow at noon.
25. (A) He should leave in the morning.
(B) He should finish the problems before midnight.
(C) He should work from midnight to morning.
(D) He shouldn't try to finish everything tonight.
26. (A) The size of the electric bill.
(B) A problem with the lights.
(C) Turning in the utility bill.
(D) Keeping the utility bill high.

27. (A) He's seen the announcement.
(B) He isn't sure what the announcement means.
(C) He's uncertain where the lobby is.
(D) He doesn't know what she's referring to.
28. (A) They haven't finished their work.
(B) The factory will shut down because it's late.
(C) They aren't supposed to work at night.
(D) They should shout about how much they have to do.
29. (A) She's doubtful about the lecture.
(B) She'll go to the lecture without her watch.
(C) The worth of the lecture is uncertain.
(D) She believes the talk will be valuable.
30. (A) Get drinks.
(B) Watch the game for now.
(C) Listen to the anthem.
(D) Finish the game.
31. (A) He doesn't like the idea of bringing a camera.
(B) Using a camera with sound is a bad idea.
(C) He doesn't like the sound of the camera.
(D) He'd like to take some pictures.
32. (A) She and the man are in agreement.
(B) She'd like to go to the moon.
(C) She thinks the airplane's flying reasonably high.
(D) She finds the prices reasonable.
33. (A) He doesn't look like he participates in sports.
(B) He doesn't like to meet most people.
(C) It occurred to him that most people aren't athletes.
(D) He isn't an athlete.
34. (A) The presentation is soon.
(B) She suggests working on the project at 12:00.
(C) She'd like to meet the man later today for lunch.
(D) She'll present her work to the man.

35. (A) He doesn't like the Bahamas.
(B) He can't make time for a trip to the Bahamas.
(C) He can't afford the trip.
(D) He wants to spend his money in the Bahamas.

Part C:

Directions:

In this part of the test, you will hear short talks and conversations. After each of them, you will be asked some questions. You will hear the talks and conversations and the questions about them just one time. They will not be written out for you. Therefore, you must listen carefully to understand what each speaker says. After you hear a question, read the four possible answers in your test book and decide which one is the best answer to the question you heard. Then, on your answer sheet, find the number of the question and fill in the space that corresponds to the letter of the answer you have chosen.

36. (A) To write his paper.
(B) To help him decide on a paper topic.
(C) To teach him about history.
(D) To discuss history with him.
37. (A) At the beginning of the semester.
(B) Before the start of the semester.
(C) Near the end of the semester.
(D) One week after the semester.
38. (A) The American Revolution.
(B) American Wars.
(C) The American Automobile.
(D) American History.
39. (A) The topic's too general.
(B) He isn't interested in technology.
(C) He doesn't have enough time.
(D) Technology has nothing to do with American history.
40. (A) A month.
(B) The semester.
(C) Seven days.
(D) A day or two.

41. (A) The purpose of the FCC.
(B) The relatively rapid development of radio.
(C) Interference from competing radio stations.
(D) The first U.S. radio station.
42. (A) Introduction to Engineering.
(B) Popular Radio Programs.
(C) Ethics in Journalism.
(D) The History of Communications.
43. (A) The many radio stations were highly regulated.
(B) In 1930 there was only one radio station in the U.S.
(C) The existing radio stations were totally uncontrolled.
(D) The FCC was unable to control the radio stations.
44. (A) First communications committee.
(B) First control committee.
(C) Federal control of communications.
(D) Federal communications commission.
45. (A) An artist.
(B) A tour guide.
(C) An Indian.
(D) Orville Wright.
46. (A) Several.
(B) Sixty thousand.
(C) Sixteen million.
(D) Millions and millions.
47. (A) The National Air and Space Museum.
(B) The Museum of Natural History.
(C) The American History Museum.
(D) The Smithsonian Arts and Industries Building.
48. (A) The American History Museum.
(B) The Smithsonian Arts and Industries Building.
(C) The Washington Museum.
(D) The National Air and Space Museum.

49. (A) The first thing today.
 (B) After visiting other museums.
 (C) Tomorrow.
 (D) Anytime before leaving Washington, D.C.
50. (A) To the White House.
 (B) To the Smithsonian.
 (C) To the mall.
 (D) To various other museums.

Listening Comprehension (2)

Part A:

Directions

For each question in part A, you will hear a short sentence. Each sentence will be spoken just one time. The sentences you hear will not be written out for you. Therefore, you must listen carefully to understand what the speaker says.

After you hear a sentence, read the four choices in your test book, marked (A), (B), (C), and (D), and decide which one is closest in meaning to the sentence you heard. Then, on your answer sheet, find the number of the question and fill in the space so the letter inside the oval cannot be seen.

1. (A) Both Alice and Joe finished journalism school.
(B) Alice and Joe gradually talked to the journalist.
(C) Before school, Alice and Joe wrote in their journals.
(D) The graduation ceremony for Alice and Joe was observed by journalists.
2. (A) I'll be very careful with bill.
(B) I'll watch bill.
(C) I'll pay the money.
(D) I'll be cautious with the money.
3. (A) It's fair for the university students to find their own apartment.
(B) It's not too difficult to find housing near campus.
(C) It's easy to find students in their apartments.
(D) It's quite difficult to locate apartments near the university.
4. (A) Was the seminar ongoing?
(B) Wasn't the summer quiet and boring?
(C) The seminar wasn't quiet, was it?
(D) Did you think the discussion was boring, too?
5. (A) Tonight you need to load your truck.
(B) Your lawn should be watered tonight.
(C) You should keep your lawn dry.
(D) You must wash your clothes this evening.
6. (A) Would you like to go for a stroll by the ocean?
(B) Do you want to wait for the speech after dinner?
(C) Shall we walk to the beach to have dinner?
(D) Should we rest after dinner or go to the beach?

7. (A) It couldn't be too hot to work.
(B) I didn't accomplish much because of the weather.
(C) I completed a lot of work in spite of the hot weather.
(D) Unless it's very hot, I don't get much work done.
8. (A) The president of the student council voted for him.
(B) He counseled students about the election.
(C) The students selected him to be council president.
(D) He helped to elect the president of the student council.
9. (A) It's important to issue the right car keys.
(B) The issue's about the importance of having a car.
(C) Car insurance is essential.
(D) Take care when you discuss the importance of the issue.
10. (A) Were you ready to leave on time?
(B) When will you have read it?
(C) How long have you been waiting?
(D) What time can we go?
11. (A) Adam's younger than his brother and sister.
(B) Adam's brother is younger than his sister.
(C) Adam's the oldest of three children.
(D) Adam's brothers and sisters are all younger than Adam.
12. (A) This is the second largest football crowd ever.
(B) This is the only time that a large crowd has attended a football game.
(C) The large crowd has attended only one football game.
(D) The football game was played in front of a large crowd only once.
13. (A) Steve heard a noise while studying for economics.
(B) Steve's grade in economics was not too bad.
(C) Steve's economics grade upset him.
(D) Steve's annoyed about the graduate degree in economics.
14. (A) The two classes meet in an hour and a half.
(B) This class meets three hours per week.
(C) Each half of the class is an hour long.
(D) Two times a week the class meets for an hour.
15. (A) I hope to find you here when I return.
(B) I won't accept your findings when I'm back.
(C) You shouldn't expect for me to return.
(D) I was surprised that you were still here.

16. (A) The boys screamed while they played.
(B) The boys' screams could be heard all over the football field.
(C) The football players put some ice on their sore muscles.
(D) First the boys played, and then they had a snack.
17. (A) Maybe you can leave on the next plane.
(B) I hope that your next fight will be more successful.
(C) Hopefully you can get on with your life.
(D) I believe in your ability to get over the fight.
18. (A) You need to write questions better.
(B) You certainly must make your writing better.
(C) Without the questions, you cannot write the answers.
(D) You need to understand the written questions better.
19. (A) Because of all her reviews, she's quite famous.
(B) She wasn't the most famous person seen at the reception/
(C) Critics think her work's good, but she's not well-known by the public.
(D) Because of the fame of the reviewer, she was well received.
20. (A) I probably left the office with the file.
(B) The file of letters must be to the left of my desk in my office.
(C) The file folder must be in my office.
(D) I must have left my office to file the letters.

Part B:

Directions:

In part B you will hear short conversations between two speakers. At the end of each conversation, a third person will ask a question about what was said. You will hear each conversation and question about it just one time. Therefore, you must listen carefully to understand what each speaker says. After you hear a conversation and the question about it, read the four possible answers in your test book and decide which one is the best answer to the question you heard. Then, on your answer sheet, find the number of the question and fill in the space that corresponds to the letter of the answer you have chosen.

21. (A) He doubts the weather will be bad.
(B) He probably won't go skiing.
(C) He thinks the weather won't be as bad as predicted.
(D) The weather forecaster didn't do a good job.

22. (A) she only spent a few cents.
(B) she couldn't find a lot of money in her purse.
(C) she spent all she had.
(D) it wasn't fair to spend the money in her purse.
23. (A) A library.
(B) A bookstore.
(C) A classroom.
(D) A newspaper office.
24. (A) That she should sit down in psychology class.
(B) That she should go to class before trying to read the chapter.
(C) That he should provide a chapter to read.
(D) That she should prepare for class.
25. (A) He should find some new clothes.
(B) He should have his clothes cleaned in a different place.
(C) He should look for a way to do his own laundry.
(D) He should give the laundry another chance.
26. (A) She knows he's not seriously injured.
(B) She hopes he'll get to the hospital quickly.
(C) She's heard all about his illness.
(D) She doesn't know how he's doing.
27. (A) It's time to go home.
(B) He's late for an appointment.
(C) His home's far away.
(D) He's ready to leave home.
28. (A) He doesn't think it's enough medicine.
(B) Taking pills every day should help her a lot.
(C) It seems like too much medicine.
(D) Maybe there aren't enough pills.
29. (A) She was unaware of the tornado.
(B) A tornado came dangerously close to her.
(C) The tornado came in through the window.
(D) She climbed out of the window when the tornado came.
30. (A) That the sweater's too warm.
(B) That the weather in Hawaii is hot.
(C) That the woman will get cold on vacation.
(D) That the woman hasn't packed for the trip.

31. (A) He must study about turtles for his exam.
(B) He comprehends that he must prepare for his exam.
(C) He'll prepare for his exams after he moves.
(D) He's not accomplishing very much.
32. (A) The printer was supposed to arrive weeks ago.
(B) Everyone's talking excitedly about the new printer.
(C) The new printer should arrive in a few weeks.
(D) The computer lab is four weeks old now.
33. (A) He needs to talk to her immediately.
(B) It bothers him to talk with her.
(C) Tomorrow is too late for their discussion.
(D) He doesn't have anything very important to say.
34. (A) This report is better than the last.
(B) It's better to publish the report annually.
(C) He feels better about the report.
(D) The report isn't too good.
35. (A) He's unable to go to the opera.
(B) He isn't very fond of opera.
(C) He likes going to the opera occasionally.
(D) He has a dentist appointment tonight.

Part C:

Directions:

In this part of the test, you will hear short talks and conversations. After each of them, you will be asked some questions. You will hear the talks and conversations and the questions about them just one time. They will not be written out for you. Therefore, you must listen carefully to understand what each speaker says. After you hear a question, read the four possible answers in your test book and decide which one is the best answer to the question you heard. Then, on your answer sheet, find the number of the question and fill in the space that corresponds to the letter of the answer you have chosen.

36. (A) A university administrator.
(B) A fellow student.
(C) A librarian.
(D) A registrar.

37. (A) How to use the library.
(B) The university registration procedure.
(C) Services offered by the Student Center.
(D) Important locations on campus.
38. (A) It isn't open many hours.
(B) It's where students buy texts for their courses.
(C) It's large and has a complete range of materials.
(D) It's often used for registration.
39. (A) To provide students with assistance and amusement.
(B) To assist students in the registration process.
(C) To allow students to watch movies.
(D) To provide textbooks for university courses.
40. (A) In administrators' offices.
(B) In the Student Center.
(C) In an auditorium.
(D) In the Student Records office.
41. (A) To a doctor's appointment.
(B) To an exercise club.
(C) To a swimming pool.
(D) To a school.
42. (A) They're both regular members.
(B) He likes to go there occasionally.
(C) She wants him to try it out.
(D) She hates to exercise alone.
43. (A) He doesn't like to exercise.
(B) The health club's too popular.
(C) Perhaps he prefers other kinds of exercise.
(D) Only members are allowed.
44. (A) A limited number.
(B) Racketball courts and a swimming pool.
(C) Exercise machines, but not classes.
(D) Just about anything.
45. (A) Visit the club once.
(B) Take out a membership.
(C) Try the club unless he hurts himself.
(D) See if he has time to go.

46. (A) Natural soaps.
 (B) Synthetic detergents.
 (C) Biodegradable detergents.
 (D) Phosphates.
47. (A) Synthetic detergents.
 (B) A major cause of water pollution.
 (C) Substances that break down into simpler forms.
 (D) The reason for the foaming water supply.
48. (A) They broke down into simpler forms.
 (B) They caused the water to become foamy.
 (C) They released phosphates into the water.
 (D) They damaged only the underground water supply.
49. (A) Non-biodegradable synthetic detergents were introduced.
 (B) The new detergents caused foamy water.
 (C) The new detergents wouldn't break down into simpler forms.
 (D) The new biodegradable detergents contained phosphates.
50. (A) Water pollution in the 1950's.
 (B) Non-biodegradable synthetic detergents.
 (C) The foamy water supply.
 (D) Problems caused by phosphates.

Part 3

Reading Comprehension

Reading Comprehension (1)

Questions 1-11

The Northwest Coast, a complex pattern of islands, coastal plains, foothills, and mountain ranges, extends from California north to Alaska, encompassing all the territory west of the Cascade and Coast Ranges. Its climate is one of even, moderate temperatures (except in the mountains) and relatively heavy rainfall. This combination of mild temperatures and abundant rainfall produces a lush, dense forest vegetation of conifers, deciduous trees, mosses, and ferns.

To its Native American inhabitants of the 1400's, the long, slender coastal region presented both a favorable and a forbidding environment. The sea and the rivers held many resources, but to exploit them required the development of superb craft to navigate waters that were often stormy and rough. The forests were rich with game and many edible plant foods, but the vegetation of much of the area was so dense that land travel was extremely difficult, and large parts of the heavily forested foothills and rugged mountains were unsuitable for human settlements. Villages instead were located along the rivers, on the shores of bays and low-lying offshore islands, and occasionally even at sheltered locations fronting on the open ocean.

It is estimated that the Northwest Coast of the 1400's had a population of about 130,000 and thus was one of the most heavily populated areas of North America north of Mexico. The people had no agriculture but, over thousands of years, had developed techniques and equipment to exploit their environment, basing their economy on fishing in streams and coastal waters that teemed with salmon, halibut, and other varieties of fish; gathering abalone, mussels, clams, and other shellfish from the rocky coastline; hunting land and sea mammals; and collecting wild plant foods. By the end of the century, they reached a high cultural level usually found only among agricultural people, enjoying a stability that allowed the development of a complex social and ceremonial life, an elaborate technology, and one of the world's great art styles.

1. Which of the following is the main point the author makes about Native Americans of the Northwest Coast?
 - (a) They raised crops unique to North America.
 - (b) They made good use of the environment to build a successful society.
 - (c) Their technology helped them survive in the area's harsh climate.
 - (d) Their culture was heavily influenced by the culture of Mexico.
2. The climate of the Northwest Coast region is generally
 - (a) warm and dry
 - (b) extremely cold
 - (c) neither very hot nor very cold
 - (d) constantly changing

3. The underlined word “game” in the passage is closest in meaning to
- (a) sport
 - (b) tricks
 - (c) wood
 - (d) animals
4. According to the passage, what probably discouraged people from trying to go from one part of the Northwest Coast region to another?
- (a) Large areas thick with bushes and trees
 - (b) Vast fields of broken ice
 - (c) Inability to understand other languages
 - (d) Disagreements over hunting areas
5. According to the passage, the Native Americans of the Northwest Coast region generally did not live
- (a) in villages
 - (b) on offshore islands
 - (c) close to rivers
 - (d) in the mountains
6. The underlined phrase “teemed with” in the passage is closest in meaning to
- (a) varied according to
 - (b) competed for
 - (c) were combined with
 - (d) were full of
7. The author implies that the Native Americans of the Northwest Coast differed from most other highly developed societies of the time because
- (a) they did not depend on agriculture
 - (b) they lacked good means of transportation
 - (c) their society arose in an arctic climate
 - (d) Their society was based on ownership of domestic animals.
8. The underlined word “they” in the passage refers to
- (a) land and sea mammals
 - (b) wild plant foods
 - (c) the people of the Northwest coast
 - (d) agricultural people
9. All of the following are mentioned in the passage as being important to the people of the Northwest Coast EXCEPT
- (a) boatbuilding skills
 - (b) forest plants for food

- (c) wood for building durable homes
- (d) plentiful supplies of seafood

10. It is clear that the author has a high opinion of the region's traditional

- (a) gardens
- (b) art
- (c) architecture
- (d) music

11. The author mentions the area's population in order to demonstrate that

- (a) the environment could support many people
- (b) trade with Mexico was of great importance
- (c) environmental problems were likely to arise
- (d) many people had migrated from Mexico to the area

Questions 12-22

The demand for portrait painting gave steady employment to surprisingly many artists in colonial North America. The nature of the work gave them a crucial economic advantage over the engraver, composer, or writer. Prints, musical scores, novels, or plays could be imported cheaply; personal portraits could not. Because portrait painting served the purpose of commemoration in a society without other visual means of preserving the memory of its ancestors, and because ideals of interior design considered massively framed portraits to be essential home furnishings, painting in the eighteenth century was a flourishing profession.

Only the preeminent painters, however, managed to establish themselves for long in one place. Once a painter completed all the available customer's portraits, there was usually no further demand for the work. Most painters belonged to the large band of traveling artists, actors, and musicians who roamed the colonies. Usually they announced their arrival and period of stay in the local newspaper, telling where specimens of their work could be seen—a coffeehouse, private residence, or the printer's office. Universally, painters advertised two selling points: cheap rates and a good likeness. Most offered to accept no payments if the person who sat for the portrait found the likeness unpleasing.

The relative costliness of the work and the demand for it made painting in colonial America a competitive and prestigious profession, a possible source of economic independence and social advancement. Some painters obviously could not survive the considerable competition. Most became neither rich nor destitute, but earned a comfortable living between painting and engaging in related work. Some painters also ran shops selling brushes, glass, turpentine, varnish, canvas, and carved frames. Other painters offered lessons in drawing or music. Success depended not only on the painter's skill but also on the kind of painting offered. Landscape painting, for instance, did not serve the purposes for which most colonists bought paintings. For provincials

anxious to mark their social level, declare their taste, display their recent material gains, and record their success for posterity, painting meant portrait painting.

12. Which of the following statements can be inferred about engravers, composers, and writers in the Colonies?

- (a) Their work was of poor quality.
- (b) They could easily become rich.
- (c) Their work was in great demand even though it was expensive.
- (d) They competed with people abroad who provided similar services.

13. The word “means” in the passage is closest in meaning to

- (a) methods
- (b) elements
- (c) purposes
- (d) problems

14. The word “flourishing” in the passage is closest in meaning to

- (a) persistent
- (b) influential
- (c) accomplished
- (d) thriving

15. The word “they” in the passage refers to

- (a) portraits
- (b) painters
- (c) colonies
- (d) specimens

16. The passage supports which of the following statements about portrait painters?

- (a) Few portrait painters enjoyed giving lessons in drawing.
- (b) The profession of portrait painting offered little prestige.
- (c) Most portrait painters advertised low rates for their services.
- (d) Most portrait painters were able to establish themselves in one location.

17. The word “universally” in the passage is closest in meaning to

- (a) on purpose
- (b) as a result
- (c) in exchange
- (d) without exception

18. A painter would cancel the fee for a portrait when the customers
- (a) were unhappy with the painting
 - (b) were art students of the painter's
 - (c) sat for the portrait in the painter's own shop
 - (d) allowed the painter to display sample works in their homes
19. The author mentions brushes, glass, turpentine, varnish, canvas, and carved frames in the passage as
- examples of items that
- (a) Portrait painters gave to their customers as gifts.
 - (b) had to be imported into the colonies
 - (c) varied greatly in price from city to city
 - (d) some painters sold to supplement their income
20. The word "anxious" in the passage is closest in meaning to
- (a) worthy
 - (b) eager
 - (c) fortunate
 - (d) obvious
21. The author states that painting meant portrait painting to imply that
- (a) colonists purchased various types of paintings
 - (b) most colonists engaged in some form of painting
 - (c) portrait painting was the most highly regarded form of painting
 - (d) the meaning of the word "painting" was confusing to many colonists
22. All of the following are reasons why portrait painters prospered EXCEPT:
- (a) There was little competition among portrait painters.
 - (b) Colonists felt that portraits were a symbol of high status in society.
 - (c) Portraits were considered important decorations for colonial homes.
 - (d) Portraits were the only way to preserve the likeness of a loved one.

Questions 23-33

There are several problems in accurately determining what bald eagles eat. The best approach is to observe the eagles and identify the prey they capture, but this is often difficult. Most studies use an indirect method for determining dietary habits. The eagle's diet can be reconstructed either by examining food remains at the nest and feeding perches or by analyzing regurgitated pellets, which contain the undigested portions of the food. Pellet analysis is, however, a poor research

technique because fish remains are either totally absent from or underrepresented in pellets, since fish are more easily digested than other foods.

The vast diversity of prey that eagles exploit is exemplified by the variety of prey remains found at their nests or under their feeding perches. Also, eagles will feed on prey of any size. Bald eagles are known to eat small rodents, but they also dine on beached whales. Their food habits can change daily or seasonally and from one location to the next, and their varied foraging tactics mean that their diet will also be diverse. When eagles steal prey from other predators, for example, they exploit a whole new range of food sources. Perhaps the only restriction the eagle faces is in the location in which it seeks prey. Eagles require large, open expanses of water or land for foraging and feeding.

Bald eagles feed primarily on fish, birds, and mammals. Using information from 20 studies of nesting eagles in North America, an overall average diet can be calculated: 56 percent fish, 28 percent birds, 14 percent mammals, and 2 percent miscellaneous sources. In other words, nesting eagles eat twice as many birds as mammals, but twice as many fish as birds.

When a choice is available, bald eagles invariably select fish over other prey. Preference tests, in which fish, bird, and mammal carrion were placed at feeding areas or provided to captive birds, showed that fish were chosen most often, followed by birds, then mammals. Although fish may be preferred, prior experience can greatly influence a bird's choice. An eagle that has been eating a particular item will likely continue foraging for it as long as it remains available.

23. What aspect of bald eagles does the passage mainly discuss?

- (a) Diet
- (b) Nesting behavior
- (c) Habitat
- (d) Hunting skill

24. Why is a pellet analysis a poor research technique?

- (a) The pellets are difficult to locate.
- (b) The proportion of fish remains is too low.
- (c) Small rodents eat some of the pellets.
- (d) The partially digested remains are too damaged to analyze.

25. According to the passage, what is one effect of an eagle stealing prey from other predators?

- (a) It reduces the time required for hunting.
- (b) The eagle is able to hunt close to its nest.
- (c) Other predators are driven away.
- (d) The variety of food available to the eagle is increased.

26. According to the passage, all of the following factors affect an eagle's choice of food EXCEPT

- (a) the season of the year
- (b) the size of the prey
- (c) what it has been eating recently
- (d) its normal preferences

27. Given a selection, which of the following would an eagle probably eat first?

- (a) Fish
- (b) Rodents
- (c) Insects
- (d) Birds

28. The word "diversity" in the passage is closest in meaning to

- (a) variety
- (b) volume
- (c) region
- (d) necessity

29. The word "next" in the passage refers to

- (a) habits
- (b) location
- (c) tactics
- (d) diet

30. The word "expanses" in the passage is closest in meaning to

- (a) areas
- (b) seasons
- (c) concentrations
- (d) studies

31. The word "prior" in the passage is closest in meaning to

- (a) significant
- (b) noticeable
- (c) past
- (d) normal

32. The word “it” in the passage refers to

- (a) fish
- (b) experience
- (c) eagle
- (d) item

33. According to the passage, the direct method of determining what bald eagles eat is to

- (a) conduct preference tests
- (b) monitor prey populations
- (c) observe eagles foraging in the wild
- (d) examine food remains at nests

Questions 34-44

Clocks were made in the United States long before entrepreneurs began to produce them in large numbers in factories. From the early eighteenth century, skilled craftspeople, many of them immigrants from England, made tall clocks with long cases. Clockmakers used many tools, among them hand-powered wheel cutting engines to cut gear wheels from imported cast brass. Cabinetmakers applied their skill to clock cases. Clockmakers, working in small shops, produced small numbers of timepieces; their clocks were works of art. They were expensive, usually more than fifty dollars without a case. Like many products of craft shops, clocks were often the work of more than one set of hands. American clockmakers bought parts from one another and imported parts and sometimes whole mechanisms from Europe to take advantage of the benefits of the division of labor.

The cost and scarcity of brass encouraged the production of clocks with wood mechanisms. By 1800 wood clocks accounted for the majority of American clock production. Many of the same techniques used in making brass clocks were modified and used for producing wood clocks. Their gears were cut on hand engines; their parts turned on foot-powered lathes. Their form, too, imitated brass clocks; most were long-case clocks. Clocks with wooden gears cost less than half the price of clocks with brass gears. Like their brass counterparts, these wooden clocks were made one at a time, by hand. Making clocks this way was a slow process. Daniel Burnap, one of the best-known makers, produced an average of only four clock mechanisms per year from 1787 to 1805.

In the eighteenth century, timepieces were expensive and few in number. One historian has calculated that there were about 42,500 clocks in the United States in 1800, and about 64,000 watches. Approximately one American adult in fifty had a clock, one in thirty-two a watch. The vast majority of the population depended on other means of telling the time. City dwellers could rely on “public time”: tower clocks, church bells, and town criers. In the countryside, sundials and “noon marks” were common.

34. What is the passage mainly about?

- (a) The contributions of clockmakers to the economic development of North America
- (b) The history of the clockmaking industry in the eighteenth and early nineteenth centuries
- (c) The artistic value of clocks made in North America
- (d) Factors that influenced the materials used in clockmaking

35. The word “them” in the passage refers to

- (a) tall clocks
- (b) clockmakers
- (c) tools
- (d) engines

36. In stating that clocks were often the work of more than one set of hands the author means that

- (a) a variety of tools were needed to make clocks
- (b) most clockmakers worked in factories
- (c) each clock was produced by several workers
- (d) many clockmakers developed unusual techniques

37. The word “scarcity” in the passage is closest in meaning to

- (a) complexity
- (b) attractiveness
- (c) familiarity
- (d) shortage

38. The word “encouraged” in the passage is closest in meaning to

- (a) improved
- (b) guaranteed
- (c) promoted
- (d) completed

39. Why were clocks with wood mechanisms produced in greater numbers than clocks with brass movements?

- (a) Wood mechanisms allowed for greater variety of design.
- (b) Wood mechanisms combined size with precision.
- (c) Wood mechanisms were less expensive to produce.
- (d) It was possible to make several wood mechanisms at one time.

40. According to the passage, wood and brass clocks were similar in their

- (a) appearance
- (b) value

- (c) durability
- (d) popularity

41. Daniel Burnap is mentioned in the passage to

- (a) illustrate how rapidly the clock industry grew in North America
- (b) describe an original technique of clockmaking
- (c) describe the variety in quality of clocks made during the late eighteenth century
- (d) illustrate how long it took to make clocks at the time

42. The word “vast” in the passage is closest in meaning to

- (a) interested
- (b) accepted
- (c) great
- (d) simple

43. Why were tower clocks, church bells, and town criers needed?

- (a) People who lived in the country found them more reliable than wooden clocks.
- (b) They made it possible for everyone in the city to know the time.
- (c) Most people used them to set the time on their watches.
- (d) They were used to introduce the work of clockmakers to the public.

44. What can be inferred from the passage about clock factories in North America?

- (a) They produced more expensive clocks than those made by hand.
- (b) They did not produce any tall clocks.
- (c) They used imported clock cases for the clocks they made.
- (d) They did not exist until after the early nineteenth century.

Questions 45-50

Rock and soil samples brought back from the moon by the Apollo astronauts have taught scientists much about the composition of the moon. Moon soil contains small bits of rock and glass and was probably ground from larger rocks when meteors impacted with the surface of the moon. Scientists found no trace of animal or plant life in the moon soil. In addition to the moon soil, astronauts gathered two basic types of rocks from the surface of the moon: basalt and breccia. Basalt is a cooled and hardened volcanic lava common to the earth. Since basalt is formed under extremely high temperatures, the presence of this type of rock is an indication that the temperature of the moon was once extremely hot. Breccia, the other kind of rock brought back by the astronauts, was formed during the impact of falling objects on the surface of the moon. This second type of rock consists of small pieces of rock compressed together by the force of impact. Gases such as hydrogen and helium were found in some of the rocks, and scientists

believe that these gases were carried to the moon on the streams of gases that are constantly emitted from the sun.

45. Which of the following would be the most appropriate title for this passage?

- (a) The Apollo Astronauts
- (b) Soil on the Moon
- (c) What the Moon is made of
- (d) Basalt and Breccia

46. According to the passage, what does moon soil consist of?

- (a) Hydrogen and helium
- (b) Large chunks of the volcanic lava
- (c) Tiny pieces of stones and glass
- (d) Streams of gases

47. Which of the following was NOT brought back to the earth by the astronauts?

- (a) Basalt
- (b) Soil
- (c) Breccia
- (d) Plant life

48. According to the passage, breccia was formed

- (a) When objects struck the moon
- (b) From volcanic lava
- (c) When streams of gases hit the surface of the moon
- (d) From the interaction of helium and hydrogen

49. According to the passage, what do scientists believe about the gases found in the moon rocks?

- (a) The gases came to the moon from the sun
- (b) The gases were created inside the rocks
- (c) The streams of gases went to the sun
- (d) The emittance of the gases caused the moon's temperature to rise

50. The author's purpose in this passage is to

- (a) Describe some rock and soil samples.
- (b) Explain some of the things man has learned from space flights.
- (c) Propose a new theory about the creation of the moon.
- (d) Demonstrate the difference between basalt and breccia.

Reading Comprehension (2)

Questions 1-11

The city is a global phenomenon. It is also a regional and cultural variable. Even within the seemingly homogenous North American cultural realm, the city shows subtle but significant differences not only between older eastern and newer western United States cities but also between cities of Canada and those of the United States. Although the urban expression is similar in the two countries, it is not identical, and the truly “North American” city is more a myth than a reality.

The Canadian city, for example, is more compact than its United States counterpart of equal population size, with a higher density of buildings and people and a lesser degree of suburbanization of populations and functions. Space-saving, multiple-family housing units are more the rule in Canada, so a similar population is housed on a smaller land area with much higher densities, on average, within the central area of cities. The Canadian city is better served by and more dependent on mass transportation by and more dependent on mass transportation than is the United States city. This dependence gives form and structure to the Canadian central city, qualities now lost in the sprawling United States metropolis, whose residents view the central district as increasingly less central to their lives. Since Canadian metropolitan areas have only one-quarter the number of kilometer of superhighways per capita as United States metropolitan areas and at least as much resistance to constructing more suburbanization of peoples and functions is less extensive north of the border than south. It is likely to remain that way.

Besides these physical differences, Canadian-United States contrasts are also apparent in their cities’ social structures. While cities in both countries are ethnically diverse Canadian communities, in fact, have the higher proportion of immigrants in the United States there are pronounced economic contrasts between central city and suburban residents. That is, there has been much less “flight to the suburbs” by middle-income Canadians. As a result, the Canadian city shows greater social stability, employment opportunities, and urban amenities than its United States counterpart. In particular, it does not have the rivalry from well-defined competitive “outer cities” of suburbia that so spread and fragment United States metropolitan complexes.

1. What does the passage mainly discuss?

- (a) Features that characterize the typical North American city
- (b) The development of suburbs in North America
- (c) Major differences between United States and Canadian cities
- (d) Population migration toward newer cities

2. What does the author mean by referring to the truly North American city as more a myth than a reality?
- (a) Commonly studies histories of cities in North America distort reality.
 - (b) Cities in Canada and the United States exhibit cultural similarities.
 - (c) There is no city that can be considered representative of all North American cities.
 - (d) Eastern and western cities display greater differences than the differences between Canadian and United States cities.
3. According to paragraph 2, which of the following statements about the typical Canadian city is true?
- (a) Canadian cities are spread out over a large area.
 - (b) Canadian cities very little in size.
 - (c) People and functions in Canadian cities are centrally concentrated.
 - (d) Canadian cities have taller buildings than other countries.
4. The phrase “the rule” in the passage is closest in meaning to
- (a) spacious
 - (b) practical
 - (c) well-built
 - (d) usual
5. It can be inferred from the passage that Canadian cities are marked by
- (a) narrow streets
 - (b) open spaces
 - (c) an absence of skyscrapers
 - (d) a coherent central area
6. The word “apparent” in the passage is closest in meaning to
- (a) unique
 - (b) obvious
 - (c) decreasing
 - (d) dependent
7. The word “pronounced” in the passage is closest in meaning to
- (a) strong
 - (b) recent
 - (c) divisive
 - (d) growing

8. It can be inferred from the passage that, when compared to their Canadian counterparts, middle-income people in the United States tend to
- (a) move away from city centers more frequently
 - (b) represent a greater range of income
 - (c) prefer living closer to urban amenities
 - (d) dominate the older eastern cities
9. The word “it” in the passage refers to
- (a) flight to the suburbs
 - (b) Canadian city
 - (c) social stability
 - (d) United States counterpart
10. The word “fragment” in the passage is closest in meaning to
- (a) hold down
 - (b) break up
 - (c) characterize
 - (d) distinguish
11. Which of the following does the author mention as a similarity between Canadian and United States cities?
- (a) The size of the land area
 - (b) The quality of mass transportation
 - (c) The density of buildings in city centers
 - (d) The resistance to constructing new roadways

Questions 12-22

Over many centuries Native American builders developed ways to keep the cold, rain, wind, and heat at bay. Traditional techniques for warming or cooling were sometimes part of the hidden engineering of a dwelling and often had little effect on its outward appearance.

Dwellings were generally heated from centrally located hearths, or separate family fires in large structures. The smaller and more subterranean the building, the easier it was to heat. Nevertheless, in chilly climates, dwellings often were built at ground level. Partitions of hanging mats broke up drafts in large structures, and split-plank, earthen, adobe, or snow-block windbreaks frequently were built against doorways.

A wide range of insulating methods was devised. The earth surrounding houses below ground level retained heat and were an effective barrier against the chill of the wind. Southwestern dwellings, called pueblos, built above ground level, used the same heat-retention principle. Their thick adobe walls soaked up heat from the sun during the day and at night radiated warmth into

the rooms. Many groups employed double-shelled walls for insulation. In the northern Plains, tents made of animal skins had an inner liner that created an insulating air pocket. When temperatures dropped, this space could be filled with dry grass, and snow could be piled around the outside. In the Aleutian Islands, the native people built double walls of planks, stuffing moss or grass in between for insulation and stacking sod against the outside walls and roof.

Relief from the heat was also important. Nearly everywhere, Native American encampments included arbors. For example, in the Southwest they were simple post-and-beam structures, shaded with leafy boughs, split cactus trunks, or cornstalks. In the southern Plains, the Kiowa and Wichita devised large bowed frames that they thatched with willow boughs to within a few feet of the ground. In scorching weather they frequently splashed the cover with water; evaporation lowered the shaded area's temperature by ten degrees or more.

In the Southeast, where humidity as well as heat was a problem, houses needed as much airflow as possible. The Seminole of the Florida swamps achieved this by constructing thatch-roofed, open-sided buildings with deep eaves and raised floors so that air circulated above and below. The raised floor also protected the occupants from the fluctuating groundwater, from insects, and from snakes.

12. The passage focuses on which of the following aspects of Native American building?

- (a) Materials used for construction
- (b) Heating and cooling techniques
- (c) The effect of engineering techniques on the appearance of a building
- (d) Protection from groundwater, insects, and snakes

13. The phrase “at bay” in the passage is closest in meaning to

- (a) in balance
- (b) on purpose
- (c) under control
- (d) by coincidence

14. Which of the following is mentioned as an advantage of a dwelling built below ground level?

- (a) It stayed dry.
- (b) It looked attractive.
- (c) It could be heated easily.
- (d) It was inexpensive to build.

15. The phrase “soaked up” in the passage is closest in meaning to

- (a) equaled
- (b) absorbed
- (c) renewed
- (d) resembled

16. It can be inferred that which of the following was done to tents in the northern Plains during warm weather?
- (a) The grass was removed from the space between the animal skins and the liner.
 - (b) The animal skins were replaced with new ones.
 - (c) The earthen floors were renewed.
 - (d) The airflow through the roof was reduced.
17. The purpose of an arbor was to
- (a) provide shade
 - (b) grow food
 - (c) resist wind
 - (d) support beams
18. The word “split” in the passage is closest in meaning to
- (a) divided
 - (b) beneficial
 - (c) plentiful
 - (d) wet
19. The word “scorching” in the passage is closest in meaning to
- (a) typical
 - (b) variable
 - (c) relatively humid
 - (d) exceedingly hot
20. Which of the following is mentioned as a building technique used by groups that lived in humid areas?
- (a) Subterranean construction
 - (b) Earthen floors
 - (c) Thick walls
 - (d) Deep eaves
21. In which of the following areas did Native Americans fill double walls with insulating material?
- (a) The Southwest
 - (b) The Aleutian Islands
 - (c) The southern Plains
 - (d) Florida
22. The author organizes the discussion of Native American building techniques in terms of
- (a) the order of their development from ancient to modern times

- (b) a comparison of their effectiveness in large and small buildings
- (c) a comparison of traditional and modern techniques
- (d) the differences caused by regional climate conditions

Questions 23-33

Because many predators kill only when their prey is moving, an animal that pretends to be dead may succeed in causing a predator to lose interest and move along in search of more lively prey. Hognose snakes have a complex repertoire of antipredator mechanisms, of which feigning death is one option. These fairly large nonvenomous or slightly venomous snakes occur in sandy habitats in the eastern United States. When first disturbed, the hognose opts for bluffing the predator—it flattens and expands the front third of its body and head, forming a hood, causing it to look larger. It then curls into an exaggerated s-shaped coil and hisses, occasionally making false strikes at its tormentor. When further provoked, however, it drops the bluff and begins to twist its body violently. Then it rolls onto its back with its mouth open and tongue hanging out loosely. If the predator loses interest in the “corpse” and moves away, the snake slowly rights itself and crawls off.

The complete repertoire of antipredator mechanisms occurs in young hognose snakes. Researchers have shown that newborn snakes are capable of making very subtle assessments of the degree of threat posed by a particular predator. Two experiments were conducted in which the recovery from death-feigning (i.e., crawling away) of newly hatched snakes under various conditions was monitored. In one experiment the recovery of snakes was monitored in the presence or absence of a stuffed screech owl mounted on a tripod one meter from the overturned snake. In another experiment the snake recovered (1) in the presence of a human staring at the snake from a distance of one meter, (2) in the presence of the same person in the same location but with eyes averted, and (3) in a control condition in which no human was visible. Both the presence of the owl and the direct human gaze resulted in longer recovery times relative to the respective control conditions. When the human eyes were averted, the recovery time was immediate. Thus, young snakes are capable of using rather subtle cues to make adjustments in their antipredator behavior.

23. From the first sentence in the passage, it can be inferred that many predators prefer

- (a) small prey
- (b) dead prey
- (c) complex prey
- (d) active prey

24. How is feigning death an “antipredator mechanism”?

- (a) It frightens a predator.
- (b) It allows the prey to prepare a surprise attack.
- (c) It causes a predator to lose interest.
- (d) It distracts a predator, allowing prey to escape unnoticed.

25. For which of the following reasons does a hognose snake expand the front third of its body and head?
- (a) To hide the back portion of its body
 - (b) To protect its head from being attacked
 - (c) To make its body appear larger than it actually is
 - (d) To increase its strength in order to strike a predator
26. The word “It” in the passage refers to
- (a) the hognose
 - (b) the predator
 - (c) head
 - (d) a hood
27. All of the following are part of bluffing EXCEPT
- (a) rolling over
 - (b) making false strikes
 - (c) hissing
 - (d) forming a hood
28. When does the hognose snake feign death?
- (a) Immediately upon seeing a predator
 - (b) When attempts to bluff a predator fail
 - (c) After it has injured a predator
 - (d) When the predator begins to lose interest
29. The author mentions the snake’s tongue hanging out loosely as an example of
- (a) how the snake provokes a predator
 - (b) what happens when the snake flattens its head
 - (c) the snake’s recovery
 - (d) how the snake pretends to be dead
30. The word “monitored” in the passage is closest in meaning to
- (a) defined
 - (b) published
 - (c) controlled
 - (d) observed

31. The experiments described in paragraph 2 measured how long it took for snakes to
- (a) notice a predator
 - (b) stop feigning death
 - (c) learn how to feign death
 - (d) recover from the attack of a predator
32. The phrase “capable of using” in the passage is closest in meaning to
- (a) able to use
 - (b) required to use
 - (c) supposed to use
 - (d) thought to use
33. Which of the following is a subtle assessment made by young snakes that is mentioned in the passage?
- (a) The difference between a stuffed owl and a real owl
 - (b) How far a predator is located
 - (c) Whether or not they are being observed
 - (d) The difference between an owl and a human

Questions 34-44

The 1920’s saw major developments in popular music in the United States. Some of the most important were technological: the establishment of commercial radio stations and the development of the public-address system, the sound track for film, and the electrical recording process used for producing phonograph records. All used [the microphone and the sound amplifier], with significant impact on the nature of orchestration and popular vocal style, and consequently on the ideas of performers, arrangers, and even songwriters. All tended to broaden the audience for popular music in a sense to nationalize it but at the same time they tended to make it a more passive one, an audience of listeners rather than participants. This process tended to heighten the importance of professionalism and sophistication among both performers and arrangers; it also tended to increase commercialism in the transmission (the “distribution”) of popular music to its audience. Thus, the era of the American popular music industry was born an inevitable result of the electronic age’s “mass media” (though the term was not yet coined).

New York City was the center of the popular music industry during the 1920’s: it had Broadway and Schubert Alley, center of the American popular musical theater, and it had Tin Pan Alley, center of the songwriting business and the still-powerful sheet music publishers. The recording studios and radio networks were also based in New York.

In addition, recordings and radio opened up new possibilities for a striking new development. They made available kinds of popular music heard [previously] only in limited geographical areas or by specific ethnic and social groups especially the blues, gospel songs, and jazz of African

Americans and the traditional music of the southern Appalachian Mountains and other rural areas of the southern and western United States. The latter music was not to affect the mainstream of American popular music until much later, but the former influenced American popular music of the 1920's in many ways. In fact, novelist F. Scott Fitzgerald could even call the era. "The Jazz Age" which reflected the inroads of African American musical influence on the nation at large.

34. What aspect of music in the 1920's in the United States does the passage mainly discuss?

- (a) The growth of musical theater
- (b) The effect of technology on the popular music industry
- (c) Technological advances in sound recording for film
- (d) The influence of professional songwriters on popular music

35. The word "establishment" in the passage is closest in meaning to

- (a) necessity
- (b) formation
- (c) connection
- (d) enrichment

36. Which of the following is NOT mentioned as a technological development of the 1920's?

- (a) The public-address system
- (b) Film sound tracks
- (c) Magnetic recording tape
- (d) The electrical recording process

37. According to the passage, what was the importance of the microphone and the sound amplifier mentioned in paragraph 1?

- (a) They caused major changes in the creation and performance of popular music.
- (b) They helped the performance of people who were not professionals.
- (c) They were used to preserve a historical record of older styles of music and performance.
- (d) They helped performers meet audience demand for louder music.

38. The word "consequently" in the passage is closest in meaning to

- (a) otherwise
- (b) in fact
- (c) therefore
- (d) although

39. The word “it” in the passage refers to the

- (a) audience
- (b) process
- (c) importance
- (d) commercialism

40. The word “heighten” in the passage is closest in meaning to

- (a) consider
- (b) announce
- (c) increase
- (d) adjust

41. Why does the passage mention New York City in paragraph 2 ?

- (a) It was a major center for the invention of new technology.
- (b) It had a significant concentration of performing, composing, and music business activity.
- (c) It had the broadest range of audiences of any city in the United States.
- (d) It was the source of a popular regional style of music.

42. What is the new development that the author discusses in paragraph 3 ?

- (a) A blending of traditional musical styles occurred.
- (b) Popular music performers began to avoid using elements of traditional music.
- (c) The center of the recording industry moved south.
- (d) Music styles formerly known only to a few people became known to many people.

43. The word “previously” in the passage is closest in meaning to

- (a) before
- (b) there
- (c) inexpensively
- (d) significantly

44. The word “era” in the passage is closest in meaning to

- (a) period
- (b) nation
- (c) movement
- (d) book

Questions 45-50

Herman Melville, an American author best known today for his novel *Moby Dick*, was actually more popular during his lifetime for some of his other works. He traveled extensively and used the knowledge gained during his travels as the basis for his early novels. In 1837, at the age of eighteen, Melville signed as a cabin boy on a merchant ship that was to sail from his Massachusetts home to Liverpool, England. His experiences on this trip served as a basis for the novel *Redburn* (1849). In 1841 Melville set out on a whaling ship headed for the South Seas. After jumping ship in Tahiti, he wandered around the islands of Tahiti and Moorea. This South Seas island sojourn was a backdrop to the novel *Omoo* (1847). After three years away from home, Melville joined up with a U.S. naval frigate that was returning to the eastern United States around Cape Horn. The novel *White-Jacket* (1850) describes this lengthy voyage as a navy seaman.

With the publication of these early adventure novels, Melville developed a strong and loyal following among readers eager for his tales of exotic places and situations. However, in 1851, with the publication of *Moby Dick*, Melville's popularity started to diminish. *Moby Dick*, on one level the saga of the hunt for the great white whale, was also a heavily symbolic allegory of the heroic struggle of man against the universe. The public was not ready for Melville's literary metamorphosis from romantic adventure to philosophical symbolism. It is ironic that the novel that served to diminish Melville's popularity during his lifetime is the one for which he is best known today.

45. The main subject of the passage is

- (a) Melville's travels
- (b) The popularity of Melville's novels
- (c) Melville's personal background
- (d) *Moby Dick*

46. According to the passage, Melville's early novels were

- (a) Published while he was traveling
- (b) Completely fictional
- (c) All about his work on whaling ships
- (d) Based on his travels

47. In what year did Melville's book about his experience as a cabin boy appear?

- (a) 1837
- (b) 1841
- (c) 1847
- (d) 1849

48. The passage implies that Melville stayed in Tahiti because

- (a) He had unofficially left his ship
- (b) He was on leave while his ship was in port
- (c) He had finished his term of duty
- (d) He had received permission to take a vacation in Tahiti

49. How did the publication of Moby Dick affect Melville's popularity?

- (a) His popularity increased immediately
- (b) It had no effect on his popularity
- (c) It caused his popularity to decrease
- (d) His popularity remained as strong as ever

50. According to the passage, Moby Dick

- (a) Is a romantic adventure
- (b) Is a single-faceted work
- (c) Is a short story about a whale
- (d) Is symbolic of man fighting his environment

Reading Comprehension (3)

Questions 1-8:

Algae is a primitive form of life, a single-celled or simple multiple-celled organism that is able to conduct the process of photosynthesis. It is generally found in water but can also be found elsewhere, growing on such surfaces as rocks or trees. The virus types of algae are classified according to pigment.

Blue-green algae, or Cyanophyta, can grow at very high temperatures and under high-intensity light. This type of algae is the oldest form of life with photosynthesis capabilities. Fossilized remains of blue-green algae more than 3.4 billion years old have been found in parts of Africa.

Green algae or chlorophyta is generally found in fresh water. It reproduces on the surfaces of enclosed bodies of water such as ponds or lakes and has the appearance of a fuzzy green coating on the surface of the water.

Brown algae, or phaeophyta, grows in shallow, temperate water. This type of algae is the largest in size and is most recognizable as a type of seaweed. Its long stalks can be enmeshed on the ocean floor, or it can float freely on the ocean's surface.

Red algae, or Rhodophyta, is a small, delicate organism found in the deep waters of the subtropics. This type of algae has an essential role in the formation of coral reefs: it secretes lime from the sea water to foster the formation of limestone deposits.

1. What is the author's main purpose?
 - (a) To show what color algae is
 - (b) To differentiate the various classifications of algae
 - (c) To describe where algae is found
 - (d) To clarify the appearance of different types of algae
2. Which of the following is NOT true about algae?
 - (a) All types have one cell only.
 - (b) It can be found out of water.
 - (c) It can use photosynthesis.
 - (d) It is not a relatively new form of life.
3. The word "pigment" at the end of the first paragraph means
 - (a) Size
 - (b) Shape
 - (c) Composition
 - (d) Color

4. Algae remnants found in Africa are
- (a) Still flourishing
 - (b) Photogenic
 - (c) Extremely old
 - (d) Red in color
5. Green algae is generally found
- (a) On the ocean floor
 - (b) On top of the water
 - (c) Throughout ponds and lakes
 - (d) Surrounding enclosed bodies of water
6. Brown algae would most likely be found
- (a) On trees
 - (b) Near green algae
 - (c) On rocks
 - (d) In the ocean
7. According to the passage, red algae is
- (a) Sturdy
 - (b) Huge
 - (c) Fragile
 - (d) Found in shallow water
8. It can be inferred from the passage that limestone deposits serve as the basis of
- (a) Coral reefs
 - (b) Red algae
 - (c) Subtropical seawater
 - (d) Secret passages

Questions 9-15:

Medical bills in the United States have risen outrageously since the beginning of the 1960's, and steps need to be taken to reverse this trend or the average American will not be able to afford medical care. The major factor in increasing the cost of medical care has been the dramatic increase in the cost of hospital services. The rise in the cost of hospitalization can be only partly blamed on inflation since hospital bills in the last two decades have risen at a considerably higher rate than inflation.

Another factor cited by doctors as major cause for the increase in the cost of medical care is malpractice. Increasingly large awards for malpractice have caused doctors to increase their rates to cover the higher malpractice insurance premiums. Because of the large malpractice awards, doctors are also prescribing more conservative and more extensive and therefore more costly treatment for patients as a defense against malpractice claims. Whatever the causes of the wild

increases in the cost of medical care, the government needs to take strong actions before it is too late for Americans.

9. What is the subject of this passage?
- (a) The increasing costs of malpractice insurance
 - (b) Factors causing the increase in U.S. medical bills
 - (c) Steps for Americans to take to obtain medical care
 - (d) The outrageous medical profession
10. According to the passage, how does the author of this passage feel about the tremendous increase in medical bills?
- (a) Disquieted
 - (b) Enthusiastic
 - (c) Impassive
 - (d) Apathetic
11. How does the author seem to feel about the tremendous increase in medical bills?
- (a) Malpractice insurance
 - (b) The cost of hospital care
 - (c) More conservative and expensive prescriptions by doctors
 - (d) Inflation
12. The passage implies that a slowing in inflation would have what kind of effect on medical costs?
- (a) Tremendous
 - (b) Nonexistent
 - (c) Slight
 - (d) Maximum
13. Which of the following is NOT stated in the passage concerning malpractice?
- (a) The increase in malpractice insurance is due to inflation
 - (b) Malpractice insurance premiums are on the increase
 - (c) The increase in malpractice payouts has caused an increase in doctors' bills
 - (d) High malpractice awards have caused doctors to work more conservatively
14. What is the author's main point in this passage?
- (a) Inflation is having a terrible effect on medical bills
 - (b) Insurance companies are at fault in raising medical bills
 - (c) Action is needed to counteract increases in medical bills
 - (d) Doctors need to work to decrease malpractice
15. What does the paragraph following this passage most likely contain?
- (a) A discussion of why the average American will soon be unable to afford medical care
 - (b) Forecasts of how inflation will influence medical care in the future
 - (c) The tremendous increases in malpractice insurance

- (d) The steps the government could take to curb medical costs

Questions 16-21:

The invention of phonograph happened quite by accident. Thomas Edison moved to Menlo Park, New Jersey, in 1876, where he established an industrial research laboratory. There Edison worked on a carbon telephone transmitter to improve the existing Bell system. In that laboratory a year later Edison invented the phonograph while trying to improve a telegraph repeater. He attached a telephone diaphragm to the needle in the telegraph repeater to produce a recording that could be played back. After some improvements to the machine, he recited “Mary a Little Lamb” and played the recognizable reproduction of his voice back to an astonished audience.

16. What is the best title for the passage?
- (a) Thomas Edison’s Many Inventions
 - (b) Improvements in the Telephone and Telegraph
 - (c) The History of Menlo Park
 - (d) A Surprise Invention
17. According to the passage, the invention of the phonograph
- (a) Was quite unplanned
 - (b) Was Edison’s principal project
 - (c) Was surprising to no one
 - (d) Took many years
18. In what year did the invention of the phonograph occur?
- (a) 1876
 - (b) 1877
 - (c) 1878
 - (d) The article does not say
19. According to the passage, how was the phonograph made?
- (a) With a telephone needle and a recorder
 - (b) From a recording of a telegraph
 - (c) With only a telegraph repeater
 - (d) From a combination of telephone and telegraph parts
20. According to the passage, how did Edison test his new invention?
- (a) He made improvements to the machine
 - (b) He used a carbon transmitter
 - (c) He read a children’s rhyme
 - (d) He reproduced the audience’s voice
21. According to the passage, how did people feel when they heard Edison’s rendition of “Mary Had a Little Lamb”?
- (a) Perplexed

- (b) Amazed
- (c) Aggravated
- (d) Detached

Questions 22-29:

The Indian cliff dwellings of the southwestern United States are a source of interest and mystery for archeologists. Located in the Four Corners area of the U.S., where Colorado, Utah, Arizona, and New Mexico meet, the cliff dwellings were constructed during the Great Pueblo period, from approximately 1050 to 1300. The cliff dwellings are whole series of contiguous rooms built in layers into the sides of cliffs. The sleeping rooms of the cliff dwellings were very tiny, often only one to two meters wide and little more than one meter high, and they were built in complexes of up to several hundred rooms together. The front rooms of the complexes were considerably larger. These larger rooms were apparently the rooms where daily life took place.

When the cliff dwellings were first found by explorers, they had been abandoned. Archeologists today are uncertain as to when or why they were abandoned and where the inhabitants went. There is some evidence, however, that the inhabitants left the cliff dwellings near the end of the thirteenth century because of a serious drought that is known to have occurred in the area from 1276 to 1299. Archeologists believe that the inhabitants could have left the cliff dwellings to move southwest and southeast. Today the descendants of the cliff dwellers are probably members of the Indian tribes of that area.

22. Which of the following is the best topic for this passage?
- (a) The Great Pueblo period
 - (b) A description of the Indian cliff dwellings
 - (c) What is known and unknown about the cliff dwellings
 - (d) The Four Corners area of the United States
23. Why did the Four Corners area receive its name?
- (a) The area is a square with four corners
 - (b) The cliff dwellings in the area each have four corners
 - (c) The Great Pueblo are four-cornered
 - (d) The corners of four states meet there
24. According to the passage, when where the cliff dwellings built?
- (a) During the Great Pueblo period
 - (b) After the drought
 - (c) Sometime before 1050
 - (d) At the same time that the explorers found them
25. According to the passage, what size were the sleeping chambers?
- (a) Wide
 - (b) Small
 - (c) High

(d) Large

26. According to the passage, what were the cliff dwellings like when the explorers first found them?
- (a) Thriving
 - (b) Full of daily life
 - (c) Empty
 - (d) In a state of drought
27. According to the passage, what do archeologists believe caused the cliff dwellers to abandon their homes?
- (a) A lack of food
 - (b) Warfare with neighboring tribes
 - (c) A desire to find a safer location
 - (d) A shortage of water
28. According to the passage, which of the following are the authorities certain about?
- (a) Why the cliff dwellers abandoned their homes
 - (b) That a drought occurred in the Four Corners area from 1276 to 1299
 - (c) Where the inhabitants of the cliff dwellings went
 - (d) When the cliff dwellers abandoned their homes
29. Which of the following is NOT discussed in the passage?
- (a) The lifestyle of the cliff dwellers
 - (b) The size of the cliff dwellings
 - (c) The mystery surrounding the abandonment of the cliff dwellings
 - (d) The location of the cliff dwellings

Questions 30-39

The U.S. Guaranteed student Loan authority provides federally subsidized 9 per cent loans directly from banks to students. The dependence of Bates College's student body on G.S.L. funds has grown more than sevenfold in the past decade. College officials say this growth is due to the increasing cost of education (tuition and board have more than doubled in ten years, but that is no greater than the inflation rate for the same period) and the shrinking disposable income of the American family. During this period, colleges have tried to accept students without regard to their ability to pay. Thus, Bates's own scholarship fund, from private donations, also increased, from \$254,000 in 1970 to \$1.4 million in 1981.

30. The first sentence of the passage means that the rate of interest paid on the loans by students (and their families) is
- (a) exactly 9 per cent.
 - (b) between 1 and 9 per cent.
 - (c) 9 per cent or more.
 - (d) Sometimes more and sometimes less than 9 per cent.

31. The money for loans is given to the students by
- (a) their colleges or universities.
 - (b) The national government.
 - (c) Their banks.
 - (d) Their families.
32. In recent years, use of G.S.L. funds by Bates College's students has apparently increased
- (a) hardly at all
 - (b) only a little
 - (c) rather steadily
 - (d) very greatly
33. According to the passage, one important reason for the recent trend in the use of such loans is the fact that
- (a) The number of students has been gradually declining.
 - (b) The cost of a university education has been steadily increasing.
 - (c) The banks are trying to reduce this kind of business
 - (d) Many students have been earning much better grades than before.
34. Another important reason for the recent trend in the use of G.S.L.s is
- (a) a decline in the availability of bank loan money.
 - (b) an increase in the availability of bank loan money.
 - (c) a decline in the ability of the average American family to pay.
 - (d) an increase in the ability of the average American family to pay.
35. According to the article, the increase in the rate of inflation in the U.S. economy over the previous decade was
- (a) much greater than that in the cost of a college education.
 - (b) only a little greater than that in the cost of a college education.
 - (c) about the same as that in the cost of a college education.
 - (d) somewhat less than that in the cost of a college education.
36. What does the article say about students unable to pay for their education at American colleges?
- (a) The colleges tried to increase the number of such students.
 - (b) The colleges stopped accepting such students.
 - (c) The colleges tried to keep such students in their student bodies.
 - (d) The colleges have never had such students in their student bodies.
37. The reason for Bates College's policy on poor students is that college officials believe that students who cannot afford a college education
- (a) are an impossible burden to any college.
 - (b) should not be denied the opportunity of a college education if they are academically able.

- (c) should not attempt to apply to Bates college for a free education.
- (d) are unfairly trying to take the place of better qualified students who can pay.

38. The passage makes clear that the scholarship money which Bates college has comes mainly from
- (a) The national government.
 - (b) The local community's private banks.
 - (c) The personal contribution of private citizens.
 - (d) The tuition paid to the college by its student body.
39. Bates College's scholarship fund has increased over the past decade at a rate
- (a) a bit lower than the rate of inflation.
 - (b) a bit faster than the rate of inflation.
 - (c) much lower than the rate of inflation.
 - (d) much faster than the rate of inflation.

Questions 40-45:

A binary star is actually a pair of stars that are held together by the force of gravity. Although occasionally the individual stars that compose a binary star can be distinguished, they generally appear as one star. The gravitational pull between the individual stars of a binary star causes one to orbit around the other. From the orbital pattern of a binary, the mass of its stars can be determined: the gravitational pull of a star is in direct proportion to its mass, and the strength of the gravitational force of one star on another determines the orbital pattern of the binary. Scientists have discovered stars that seem to orbit around an empty space. It has been suggested that such a star and the empty space really compose a binary star. The empty space is known as a *black hole*, a star with such a strong gravitational force that no light is able to get through.

40. A binary star could best be described as
- (a) Stars that have been forced apart
 - (b) A star with a strong gravitational force
 - (c) Two stars pulled together by gravity
 - (d) A large number of attached stars
41. According to the passage, what happens as a result of the gravitational force between the stars?
- (a) One star circles the other
 - (b) The mass of the binary star increases
 - (c) A black hole is destroyed
 - (d) The gravitational force decreases
42. According to the passage, what can scientists learn from the pattern of a binary star's orbit?
- (a) The proportion of the star's gravitational pull to its mass
 - (b) How to distinguish the stars that compose a binary
 - (c) Why there is no light in a black hole
 - (d) The mass of the stars that compose the binary

43. According to the passage, what is a black hole?
- (a) An empty space around which nothing orbits
 - (b) A star with close to zero gravity
 - (c) A star whose gravitational force blocks the passage of light
 - (d) An empty space so far away that no light can reach it
44. Which of the following statements about black holes is NOT true?
- (a) A black hole can have a star orbiting around it
 - (b) A binary star can be composed of a black hole and a visible star
 - (c) All empty space contains black holes
 - (d) The gravitational pull of a black hole is strong
45. This passage would most likely be assigned reading in a course on
- (a) Botany
 - (b) Astrophysics
 - (c) Geology
 - (d) Astrology

Questions 46-50:

In west-central New York State there is a group of eleven long, narrow lakes known as the Finger Lakes. These lakes have been aptly named because of their resemblance to the fingers of a hand. Two of the largest of the Finger Lakes, Seneca and Cayuga, exemplify the selection of the name: Seneca is 37 miles long and 4 miles across at its widest point, and Cayuga is 40 miles long and 2 miles across. Although scientists are uncertain as to how these lakes were formed, most believe that glacial ice forged out the valleys to a depth well below sea level, and with the melting of the glaciers the lakes were formed.

46. How could the Finger Lakes be described?
- (a) As basically circular
 - (b) As all the same size
 - (c) As tiny
 - (d) As long and thin
47. According to the passage, why are these lakes known as Finger Lakes?
- (a) They are the same size as fingers
 - (b) Their shape is similar to a finger's
 - (c) Their composition is the same as a finger's
 - (d) There are as many lakes as there are fingers
48. Why does the author mention Seneca and Cayuga Lakes?
- (a) They are the only two Finger Lakes
 - (b) They are the two largest lakes in the United States
 - (c) They are good examples of long and narrow Finger Lakes
 - (d) They are long and wide

49. The passage implies that Seneca Lake is
- (a) A constant 4 miles wide
 - (b) At least 4 miles wide at each point
 - (c) Wider than it is long
 - (d) Narrower than 4 miles at certain points
50. What do most scientists believe caused the formation of the Finger Lakes?
- (a) The sea level decreased
 - (b) Heavy rainfalls flooded the area
 - (c) The melted glaciers carved out the valleys
 - (d) Glaciers cut into the land and then melted to fill the valleys

Reading Comprehension (4)

Questions 1-7:

In the American colonies there was little money. England did not supply the colonies with coins and it did not allow the colonies to make their own coins, except for the Massachusetts Bay Colony, which received permission for a short period in 1652 to make several kinds of silver coins. England wanted to keep money out of America as a means of controlling trade: America was forced to trade only with England if it did not have the money to buy products from other countries. The result during this pre-revolutionary period was that the colonists used various goods in place of money: beaver pelts, Indian wampum, and tobacco leaves were all commonly used substitutes for money. The colonists also made use of any foreign coins they could obtain. Dutch, Spanish, French, and English coins were all in use in the American colonies.

During the Revolutionary War, funds were needed to finance the war, so each of the individual states and the continental congress issued paper money. So much of this paper money was printed that by the end of the war it was virtually worthless. As a result, trade in goods and the use of foreign coins still flourished during this period.

By the time the Revolutionary War had been won by the American colonists, the monetary system was in a state of total disarray. To remedy this situation, the new constitution of the United States, approved in 1789, allowed only congress to issue money. The individual states could no longer have their own money supply. A few years later, the coinage act of 1792 made the dollar the official currency of the United States and put the country on a bimetallic standard. In this bimetallic system, both gold and silver were legal money, and the rate of exchange of silver to gold was fixed by the government at sixteen to one.

1. This passage mainly discusses
 - (a) American money from past to present
 - (b) The English monetary policies in colonial America
 - (c) The effect of the Revolution on American money
 - (d) The American monetary system of the seventeenth and eighteenth centuries
2. The passage indicates that during the colonial period, money was
 - (a) Supplied by England
 - (b) Coined freely by the colonists
 - (c) Scarce
 - (d) Used extensively for trade
3. The Massachusetts Bay Colony was allowed to make coins
 - (a) Continuously from the inception of the colony
 - (b) Throughout the seventeenth century
 - (c) From 1652 until the Revolutionary War
 - (d) For a short time during one year

4. Which of the following is NOT mentioned in the passage as a substitute for money during the colonial period?
- (a) Wampum
 - (b) Cotton
 - (c) Tobacco
 - (d) Beaver furs
5. According to the passage, what happened to the American monetary system during the Revolutionary War?
- (a) The continental congress issued gold and silver coins
 - (b) Individual states were not allowed to issue money
 - (c) So much paper money was circulated that it lost its value
 - (d) American money replaced trade in goods and foreign coins
6. How was the monetary system arranged in the constitution?
- (a) Only the U.S. congress could issue money
 - (b) The U.S. officially went on a bimetallic monetary system
 - (c) Various state governments, including Massachusetts, could issue money
 - (d) The dollar was made the official currency of the U.S.
7. According to the passage, which of the following is NOT true about the bimetallic monetary system?
- (a) Either gold or silver could be used as official money
 - (b) Gold could be exchanged for silver at a rate of 16 to 1
 - (c) The monetary system was based on two metals
 - (d) It was established in 1792

Questions 8-14:

The brain of the average human weighs approximately 14 kilograms and consists of three main parts: the cerebrum, the cerebellum, and the brain stem. The cerebrum is by far the largest of the three parts, taking up 85% of the brain by weight. The outside layer of the cerebrum, the cerebral cortex, is a grooved and bumpy surface covering the nerve cells beneath. The various sections of the cerebrum are the sensory cortex, which is responsible for receiving and decoding sensory messages from throughout the body; the motor cortex, which sends action instructions to the skeletal muscles; and the association cortex, which receives, monitors, and processes information. It is in the association cortex that the processes that allow humans to think take place. The cerebellum, located below the cerebrum in the back part of the skull, is the section of the brain that controls balance and posture. The brain stem connects the cerebrum and the spinal cord. It controls various body processes such as breathing and heartbeat.

8. What is the author's main purpose?
- (a) To describe the functions of the parts of the brain
 - (b) To explain how the brain processes information
 - (c) To demonstrate the physical composition of the brain

- (d) To give examples of human body function
- 9. The passage states that the most massive part of the brain is the
 - (a) Cerebrum
 - (b) Cerebellum
 - (c) Cerebral cortex
 - (d) Brain stem
- 10. How does the passage describe the appearance of the cerebral cortex?
 - (a) As smooth
 - (b) As 85% of the brain by weight
 - (c) As a layer of the cerebellum
 - (d) As ridged
- 11. According to the passage, which part of the brain analyzes information?
 - (a) The sensory cortex
 - (b) The association cortex
 - (c) The cerebellum
 - (d) The brain stem
- 12. The sensory cortex
 - (a) Senses that messages should be sent out to the muscles
 - (b) Provides a surface covering for nerve cells
 - (c) Is where the human process of thinking occurs
 - (d) Receive and processes information from the senses
- 13. Which of the following is true about the cerebellum?
 - (a) It is located above the cerebrum
 - (b) It controls breathing
 - (c) It is responsible for balance
 - (d) It is the outside layer of the cerebrum
- 14. What shape does the brain stem most likely have?
 - (a) Small and round
 - (b) Long and thin
 - (c) Large and formless
 - (d) Short and flat

Questions 15-19:

The next famous woman writer to be considered is Dorothy Parker, an American poet, short story writer, and literary critic who became famous in the early twentieth century for her witty but cynical observations on life. She got her first paying job as a writer in 1916 at the age of 23 when

she began working for a women's magazine, and nine years later she became a contributor to The New Yorker as a book reviewer.

In addition to her magazine work, she published volumes of poetry and short stories with the recurrent themes of disappointment with life and the loss of idealism. One of her most famous observations, "Men seldom make passes/At girls who wear glasses," came from the poem "News Item," which was published in the volume *Enough Rope* (1926). This volume of poetry was followed by *Sunset Gin* (1928), *Death and Texas* (1931), and a collection of short stories *Here Lies* (1939).

15. According to the passage, Dorothy Parker was NOT famous for
 - (a) Poetry
 - (b) Humor
 - (c) Book reviews
 - (d) Autobiography

16. Dorothy Parker's first job was
 - (a) For a women's magazine
 - (b) As a literary critic
 - (c) For The New Yorker
 - (d) As a short story writer

17. In line 7, the word "recurrent" could best be replaced by which of the following?
 - (a) Related
 - (b) Repeated
 - (c) Flowing
 - (d) Negative

18. In what year did "New Item" appear?
 - (a) 1916
 - (b) 1926
 - (c) 1928
 - (d) 1931

19. With what topic does the paragraph preceding the passage most likely deal?
 - (a) Dorothy Parker's early childhood
 - (b) American literature of the nineteenth century
 - (c) An introduction to literary criticism
 - (d) A well-known female author other than Dorothy Parker

Questions 20-24:

Fog occurs when damp air above the surface of the earth is cooled to the point at which it condenses. Of the two types of fog, advection fog occurs along the ocean coast or near rivers or lakes. This type of fast-moving fog, which may cover vast areas, occurs when warm winds blow across a cold surface of land or water. In this collision of heat and cold, the warm air is cooled to the point at which the water vapor condenses into fog. Radiation fog, quite different from advection fog, is immobile could-like moisture generally found hovering over wintertime valleys. It occurs on clear nights when the earth's warmth escapes into the upper atmosphere.

20. According to the passage, fog is found when wetness in the air is
- (a) Vaporized
 - (b) Cooled
 - (c) Dampened
 - (d) Heated
21. According to the passage, advection fog is found
- (a) In valleys
 - (b) In the ocean
 - (c) Near bodies of water
 - (d) Only in small, enclosed areas
22. In the passage, radiation fog is said to be
- (a) Similar to advection fog
 - (b) Found in coastal areas
 - (c) Fast-moving
 - (d) Trapped moisture hanging over inland valleys
23. According to the passage, which of the following statements about fog is true?
- (a) Advection fog is caused when cold winds blow across a heated land surface
 - (b) Advection fog is the type of fog that occurs in small valleys on clear nights
 - (c) Radiation fog occurs when the cooled atmosphere meets with heat from the earth
 - (d) Radiation fog generally moves quickly across vast areas of land
24. The author's purpose in this passage is to
- (a) Explain the different types of fog
 - (b) Describe where different types of fog are found
 - (c) Discuss advection fog
 - (d) Give a scientific description of various types of precipitation

Questions 25-29:

The White House, the official home of the United States president, was not built in time for George Washington to live in it. It was begun in 1792 and was ready for its first inhabitants, president and Mrs. John Adams, in 1800. When the Adamses moved in, the White House was not yet complete, and the Adamses suffered many inconveniences. Thomas Jefferson, the third president, improved the comfort of the White House in many respects and added new architectural features such as terraces on the east and west ends. When British forces burned the White House on August 24, 1814, President Madison was forced to leave, and it was not until 1817 that then President James Monroe was able to return to a rebuilt residence. Since then, the White House has been occupied by each U.S. President.

25. Which of the following would be an appropriate title for this passage?
- (a) George Washington's life in the White House
 - (b) The Burning of the White House
 - (c) The Early History of the White House
 - (d) Presidential Policies of Early U.S. Presidents
26. Why did George Washington NOT live in the White House?
- (a) It had been burned by the British
 - (b) He did not like the architectural features
 - (c) He did not want to suffer the inconvenience that the Adamses had suffered
 - (d) Construction had not yet been complete
27. It can be inferred from the passage that John Adams was
- (a) The first president of the United States
 - (b) The second president of the United States
 - (c) The third president of the United States
 - (d) The fourth president of the United States
28. According to the passage, which of the following best describes Thomas Jefferson's tenure in the White House?
- (a) He had to flee the White House because of the war with the British
 - (b) He was accepting of the many inconveniences
 - (c) He removed the terraces that had been added by Adams
 - (d) He worked to improve the appearance and convenience of the White House
29. According to the passage, when James Monroe came back to the White House, it had been
- (a) Repressed
 - (b) Reconstructed
 - (c) Relocated
 - (d) Reserved

Questions 30-34:

Biofeedback is on the verge of becoming an important tool in medical therapy. Using biofeedback, a patient can learn to control certain body systems, such as heartbeat, temperature, or blood pressure, that are normally autonomic or self-regulating. The patient is attached to a machine measuring the function he wishes to control. When the desired result is achieved, the patient hears a steady tone that indicates that the patient has successfully manipulated that the body function to a more desirable state. For example, if a patient wishes to learn to control his heartbeat, he is attached to a biofeedback machine monitoring his heartbeat. When the patient manages to successfully slow his heartbeat, the biofeedback machine rewards him with a low, dull noise. Today researchers are using biofeedback to treat patients with such maladies as irregular heartbeat, migraine headaches, and high blood pressure. The medical community foresees myriad application that may be treated with biofeedback in the future.

30. The main purpose of this passage is to
- (a) Describe a medical technique that is being used extensively today throughout the medical community
 - (b) Describe a new, potentially helpful medical treatment
 - (c) Teach patients how to use biofeedback machine
 - (d) Explain how a patient uses biofeedback to control his heartbeat
31. According to the passage, what is an autonomic body process?
- (a) Self-controlling
 - (b) Usual
 - (c) Consciously regulated
 - (d) Disorganized
32. According to the passage, how does a patient know that he has achieved a desired result when using a biofeedback machine?
- (a) The machine records the results
 - (b) He hears a sound
 - (c) The doctor gives him a reward
 - (d) The machine monitors the process
33. Which of the following medical problems would probably NOT be treated by biofeedback?
- (a) A tension headache
 - (b) Fever
 - (c) Irregular heart rhythm
 - (d) A broken leg
34. According to the passage, what do medical authorities see in the future for biofeedback?
- (a) Numerous problems
 - (b) Decreased implementation
 - (c) Many different uses
 - (d) Rejection by the medical community

Questions 35-40:

Distillation, the process of separating the elements of a solution, is widely used in industry today. The two most common methods of distillation are fractional distillation, used in the preparation of alcoholic beverages, and flash distillation, used for the conversion of ocean water to fresh water.

In fractional distillation a mixture is separated into its various component parts by boiling. This method makes use of the fact that different elements boil at varying temperatures. For example, alcohol has a considerably lower boiling temperature than water: the boiling temperature of water is 212 degrees and the boiling temperature of alcohol is 172 degrees. Thus, when a mixture of alcohol and water is heated, the alcohol vaporizes more quickly than the water. The distillate is collected and the process is repeated until the desired purity has been achieved.

Flash distillation does not require high temperatures but instead is based on pressure. In this process, a liquid that is to be separated is forced from a compartment kept under high pressure into a compartment kept at a lower pressure. When a liquid moves into the low-pressure chamber, it suddenly vaporizes, and the vapor is condensed into distillate.

35. According to the passage, what makes fractional distillation occur?
- (a) Time
 - (b) Pressure
 - (c) Heat
 - (d) Water
36. According to the passage, fractional distillation can occur only if
- (a) One element is at a higher pressure than the other
 - (b) The elements of the solution have different boiling temperatures
 - (c) The solution is forced from a compartment at one temperature into another temperature
 - (d) The solution to be distilled is completely pure
37. Which of the following statements about boiling temperatures is true?
- (a) All elements have the same boiling temperature
 - (b) Water boils at a lower temperature than alcohol
 - (c) Any solution containing water boils at 2112 degrees
 - (d) Water does not boil at as low a temperature as alcohol
38. According to the passage, in the flash distillation process, what causes the liquid to vaporize?
- (a) The pressure on the liquid is suddenly changed
 - (b) The liquid changes compartments
 - (c) The addition of sea water to a solution causes a chemical change to occur
 - (d) There is a rapid increase in the pressure on the liquid
39. Which of the following processes would probably involve distillation?
- (a) Adding a new substance to a mixture
 - (b) Dividing a pure element into smaller quantities

- (c) Mixing two elements together to form a new solution
- (d) Removing impurities from a solution

40. The main purpose of this passage is to
- (a) Explain how salt water can be turned into fresh water
 - (b) Give an example of fractional distillation
 - (c) Describe a scientific process discuss the boiling temperatures of various liquids
 - (d) Discuss the boiling temperatures of various liquids

Questions 41-45:

Desert tundra, or cold desert, occurs on the Arctic edges of North America, Europe, and Asia. In these areas the near eternal freezing temperatures cause an environment in which plant life is virtually impossible. The existence of ice rather than water for the majority of the year means that vegetation lacks sufficient moisture for growth. During the short period of time when the temperature increases enough for the ice to melt, there is generally a large volume of water. This excess of water, coupled with a lack of drainage through the frozen subsoil, does not allow vegetation to flourish.

41. What would be the most appropriate title for the passage?
- (a) Where Desert Tundra is Found
 - (b) The Weather in the Arctic
 - (c) Why Cold Deserts Occur
 - (d) The Variety of Plant Life in Desert Tundra
42. According to the passage, desert tundra is found
- (a) Throughout North America, Europe, and Asia
 - (b) In Antarctica
 - (c) On the Arctic borders of the northern continents
 - (d) At the North Pole
43. According to the passage, what makes plant life almost impossible in areas of desert tundra during most of the year?
- (a) Excessive water on the plants
 - (b) The frozen state of the water
 - (c) The increase in temperature
 - (d) The lack of ice
44. Which of the following happens when the weather heats up?
- (a) Plants can flourish
 - (b) Vegetation lacks sufficient moisture
 - (c) The days become shorter
 - (d) There is too much water

45. According to the passage, why can't the water drain after it melts?
- (a) The land beneath the surface is still frozen
 - (b) The temperature is too high
 - (c) The period of time is too short
 - (d) The vegetation is flourishing

Questions 46-50:

Geographically, California's diversity is breathtaking, and the state's coastline from north to south is no exception. Measuring 840 miles in length, the coast consists of the rugged cliffs of the Coast Ranges in the north and wide sandy beaches in the south. Along the coastline there are two major harbors, one in the north at San Francisco, the other in the south at San Diego. Near Humboldt and Monterey are smaller natural harbors.

46. The topic of this passage is
- (a) How the state of California is divided into north and south
 - (b) The variations in California's coastal geography
 - (c) The breathtaking beauty of California
 - (d) The exceptions in coastal geography
47. According to the passage, what measures 840 miles in length?
- (a) The California coastline
 - (b) The Coast Ranges
 - (c) The rugged cliffs
 - (d) The exceptional part of northern California
48. The coast ranges are
- (a) Flat, sandy areas on the coast of California
 - (b) Found in southern California
 - (c) A series of mountains
 - (d) Hundreds of miles north of the cliff
49. It is implied in the passage that northern California
- (a) has more beaches than southern California
 - (b) is roughly the same as southern California
 - (c) has fewer major harbors than southern California
 - (d) has a substantially different coastline from southern California
50. According to the passage, where are the major harbors located in California?
- (a) In San Diego
 - (b) Only in northern California
 - (c) Near Humboldt and Monterey
 - (d) In the north and in the south
